

Thorsman Poles

Thorsman poles can be used for providing mechanical and electrical services to laboratory benches, equipment or other plant items in open plan spaces where there are no walls or insufficient wall space to run services local to kit.

They provide a neat and tidy solution that can offer flexibility.

- Various types depending on the extent of services to be fitted in the pole.
- House electrical power, telecom, low voltage and data.
- Socket outlets on pole.
- Special covers and connections can be provided to improve IP ratings.
- Piped services can be accommodated such as gases, water etc.
- Ventilation exhaust pipes and ducts can be accommodated.
- Can easily be altered and moved.
- Floor mounted, bench mounted, desk mounted or via cable ladder bracket.
- Eliminates trailing leads or hoses across floors.
- Heavy duty and robust.
- Bespoke manufacture for application.
- Pre-wired and piped poles are available for quick and easy installation.
