

Pre-fabricated Pump Set

Pre-fabricated pump set arrangement is constructed off site, self supporting and allows delivery to be made on a 'as and when needed basis'.

Key Points & Benefits:

- Fabrication of the pump sets are unaffected by other site activities.
- Work can proceed irrespective of weather and site conditions.
- Potential programme benefits.
- Assembly of pump sets are carried out in a controlled environment, resulting in improved quality.
- Better health and safety, better access, lighting, etc.
- Work can be snagged, tested and pre-commissioned prior to being delivered to site.
- Eliminates requirements for builders work plinths for pumps.
- Less components than traditional pump set arrangements.
- Fewer deliveries required to site.
- Less manhandling on site.
- Cost effective.
