

DESK MOUNTED POWER, DATA AND VOICE MODULES.

Desk mounted Power, Data and voice modules, which allow convenient access to sockets, in areas away from fixed service locations.

- Fixed desktop units are preferable to loose units on the floor.
- Eliminates reaching under desks to access sockets.
- Useful where floor boxes or power poles are not viable/desirable.
- Can be clamped to tool rail, slat wall, desk edge or attached via adhesive strip giving flexibility of positioning on or to the rear of any desk.
- Modules connect to local service points via under desk cable management.
- Available in any combination of power/data/voice sockets.
- Useful in office refurbishments, allowing flexibility of layout without modifying existing fixed services.
- More details available via <http://www.dbpformfittings.com>.
