

BOSS X3 - MICRO POWERED ACCESS PLATFORM.

The Youngman BOSS X3 machine is a nifty piece of kit used for working at height within existing buildings. This machine gets you to 4.55m working height without the need for out riggers. The wheel loadings are quite low so it should operate quite safely on a normal concrete floor slab. The overall dimensions are small and it can fit comfortably in most normal lifts.

Boss X3 in Action

Fits in most lifts

Key Points:-

1. Very small dimensions & extremely movable.
2. SWL of 240kg = 1 person tools and materials
3. Maximum Platform Height 2.55m, Maximum Safe Working Height 4.55m.
4. Will fit into most standard lifts.
5. Self weight = 349kg, Max Wheel load = 450kg force.
6. No outriggers required so reduces tripping hazards.
