

High Specification Dumper Trucks

ACS have taken delivery of two new specially designed dumper trucks which offer improved safety features and driver comforts. Drivers of these new trucks will be able to work effectively all year round with the new features fitted.

This new Level 2 ROPS and FOPS cab protects the operator with an engineered, reinforced structure, to reduce injury from the machine overturning or from falling objects.

Key Points:-

- Tinted side & rear glass to reduce solar glare for operator comfort and safety.
- A “Pop Out” modular glazing system used to enhance operational optimization.
- Fully controllable cab heater for driver comfort.
- Ventilation system with both dust and pollen filters.
- Keyless, lockable panel for daily maintenance checks.
- Green Beacon and seat belt safety system.
