

Ice Warning Signs on Roads

- These battery operated signs warn drivers and pedestrians of a greater risk of ice forming by flashing when the temperature drops to 3°C or below.
- Can also be a good indicator to deploy gritting procedures.
- Signs can be customised with Company or Project logos
- Easy installation - can be fixed to walls or posts.
- Low maintenance – Batteries last 2-3 years

Restrictions

- Need to ensure the batteries are replaced (don't want to wait until the batteries run out)
